

### Practical 3

**Aim: Create and application using Flutter Key Widgets**

**Code:**

Source file: main.dart

```
void main(){  
  runApp(MaterialApp(home:  
    Scaffold(appBar:  
      AppBar(title:  
        Text("flutter App" , style:TextStyle(color: Colors.yellow,fontSize: 30) ,),  
        body:Text("Using Key Widget ",  
          style: TextStyle(color:Colors.black, fontSize: 50),))),  
  )  
}
```

**Output:**
